Some boundaries just make life better.
Shower partitions are now essential in any modern bathroom, where convenience is just as crucial as aesthetics. Customisable to suit the dimensions of different bathrooms, CERA customised shower partitions segregate the wet areas from the dry, optimising space. This ensures that only the showering area is wet while the rest of the bathroom floor stays dry. These partitions can be made out of toughened glass, 8 mm or 10 mm thick.

Further, CERA also offers walk-in shower partitions. A walk-in shower door or a glass screen ensures that you freely move in and out of your shower space without any restrictions. Besides ensuring clearly demarcated wet and dry areas, these partitions are designed to make bathrooms look more spacious.
